

NorthRidge Software ProductCenter Utilities

Database Merge

NorthRidge Software has supported ProductCenter customers for over a decade. During this time, we have developed many administrative solutions for the ProductCenter suite of applications.

The objective for these solutions is to extend the administrative capabilities of ProductCenter in the areas of schema management, data consolidation and task automation.

The Database Merge Utility will consolidate one or more ProductCenter databases into a single unified repository.

RDBMS/ProductCenter/OS Support

Oracle	9i
ProductCenter	8.4.x or later
Operating Systems	Solaris 8 or later HPUX 11i Windows 2000, XP

Excellence, Commitment, Focus

Medium to large manufacturing organizations who use ProductCenter often adopt a multi-site, multi-database installation strategy during their initial deployment. Over time however, they may wish to consolidate these ProductCenter sites into one location with a single enterprise-wide database. In addition, long-time ProductCenter customers may acquire new companies who also have an existing ProductCenter installation. Unifying these sites and databases are often considered important strategic objectives for a company.

Introducing Database Merge ...

The ProductCenter Database Merge Utility from NorthRidge Software permits a qualified administrator or ProductCenter consultant to automate the merging of two or more ProductCenter database instances into one. The consolidation of sites and databases can help reduce site maintenance costs, eliminate duplicate information and simplify your information management security policies.

With Database Merge, You Can ...

- Consolidate administrative objects such as users, groups, classes, forms, links, baselines and reports.
- Unify workflow objects such as process definitions, process instances, activities, assignments, post operations and attachments.
- Merge files from your distributed vault and replication spaces.
- Generate analysis reports identifying naming conflicts among administration and item objects.
- Process several hundred ProductCenter objects per second on a server class machine.

About NorthRidge Software, LLC

NorthRidge Software, LLC provides products and services that allow customers to realize the full potential of their Product Lifecycle Management (PLM/PDM) investment. The NorthRidge team extends the capabilities of PLM by delivering highly specialized, web-based clients and administrative utilities to meet the end user's specific requirements.
