

## NorthRidge Software and Lucidworks Partner to Accelerate Deployment of Search Based Applications

Windham, New Hampshire – October 21, 2014 — NorthRidge Software, a developer of advanced search solutions, has partnered with Lucidworks, the company transforming the way people access information, to deliver an integrated combination of products that will allow companies to deploy enterprise search applications at a fraction of the time and cost of more traditional methods.

*Lucidworks Fusion* can be downloaded, installed and operational in minutes and provides enterprise-grade capabilities to design and develop search applications – at any scale. Using Fusion’s comprehensive indexing technology, search application developers can connect to multiple content sources to quickly populate a Solr search index that is unmatched in performance and capability.

*Discover Enterprise*, from NorthRidge Software, delivers a number of out-of-the-box templates and a powerful UI engine to allow those responsible for delivering search to the end users a fast-track method for doing so. The Discover Enterprise quick-deployment model brings end users into the early phases of search-based applications to better support an agile development and deployment model. The robust client application framework provides the tools necessary to transition early stage prototypes into feature-rich search solutions that meet the precise requirements of the users.

“We see the partnership with NorthRidge Software as instrumental to including end users in the early phases of enterprise search application projects,” says Keith Messick, CMO at Lucidworks. “Discover Enterprise is the perfect complement to our Fusion search platform in that it completes the last mile to the end user.”

"Our customers have been asking for an enhanced search platform that supports broader access to their enterprise content sources," states Al Cole, Principal at NorthRidge Software. "Combining our out-of-the-box search applications with Fusion's comprehensive suite of connectors and advanced administrative capabilities will allow us to dramatically accelerate the time to value for our customers."

### **Lucidworks**

Lucidworks builds enterprise search solutions for some of the world’s largest brands. Fusion, Lucidworks’ advanced search platform, provides the enterprise-grade capabilities needed to design, develop, and deploy intelligent search apps — at any scale. Companies across all industries – from consumer retail and healthcare to insurance and financial services – rely on Lucidworks every day to power their consumer-facing and enterprise search apps.
